Experience

Slippery Rock University – Asst. Director of Web Communications and Marketing

2018 – 2026

Managed and maintained thousands of users, pages, and assets in an enterprise environment, while ensuring content quality and 508 accessibility standards. Managed small teams in the development of new web/media assets and applications according to institutional need.

SAP Ariba – Commerce Support Engineer

2017 – 2018

Provided technical and developmental support to hundreds of international companies utilizing a complex business-to-business commerce platform. Explained difficult technical concepts to users in clear terms in a friendly and professional way, and implemented timely fixes to commerce-blocking issues.

Puppetbucket Games LLC

2025 – Present

Started a sole proprietorship video game development company, currently solo developing *Asynchnauts* in the Godot Engine for commercial release on PC.

Freelance Dev/Design

2014 – Present

Created CMS-based websites for local small businesses, designed graphics and media for various organizations and non-profits, and wrote copy in a variety of formats.

SRU – Web Developer

2015-2016

Student employment at University. Created thousands of pages and assets under the direction of the Web Director. Trained faculty in the use of the Ingeniux CMS.

Education

Slippery Rock University – BS in Computing / Information Technology

Studied front-end web development, app development, database administration, graphic and multimedia design, networking, and general tech support. Took courses in digital design and marketing.

Other Achievements & Skills

WQED – Steeltown Entertainment Project

2009 – 2010

Worked as an intern with a non-profit with the goal of generating interest in Pittsburgh as a hotspot for cost-effective production in big-budget films. Helped to stage the first ever Steeltown Film Factory event, a local filmmaking competition taking projects from conception to being screened at notable festivals.

Cyber Security Fair

2016

Presented a talk and demonstrations on the basics of cryptography and web security in an annual fair for the public at the SRU campus.
